

OHIO CASINO CONTROL COMMISSION

Mike DeWine
Governor

Thomas J. Stickrath
Chair

Dear Applicants and Licensees:

On September 1, 2023, the Ohio Casino Control Commission (Commission") will implement changes to Ohio Administrative Code Chapter 3772-50, the rules governing the licensing and regulation of skill-based amusement machines in Ohio. Updates were made to the rules to improve clarity or readability or to reduce redundancies in and between Administrative and Revised Codes. Additionally, many changes have been made to update, streamline, and standardize rule language. As a result of these changes, some rules have been rescinded or combined. As a skill-based amusement machine-related applicant or licensee, it is important that you familiarize yourself with the rules and the upcoming changes as they pertain to you and your business operations. You may view the changes to the rules [here](#).

Two of the most notable changes will impact the Skill-Based Amusement Machine Key Employee License and the fee payment process for all license types. The Skill-Based Amusement Machine Key Employee License type is being rescinded and will no longer be required. If you currently hold a Skill-Based Amusement Machine Key Employee License it will automatically expire on September 1, 2023. Pending applications will be closed, and no further action will be needed by any applicant.

Additionally, the fee payment process will change. The amount of the fee has not changed; however, it will now entirely be paid upon submission of the license application rather than paying an application fee when submitting an application, and an additional license fee to receive the license. This change should expedite the process to receive a license. The fee amounts may be found on the [Commission's website](#).

If you have any questions regarding the changes to the rules, you may contact the Skill Games Division at (614) 387-0318 or at skillgames@casinocontrol.ohio.gov.

Sincerely,

A handwritten signature in blue ink that reads "Andromeda Morrison".
